

PROJECT OVERVIEW:

The Arizona Department of Transportation (ADOT) is preparing to begin a project to provide increased connectivity to the traveling public at the I-10/Loop 303 interchange. The \$83 million project includes several new ramps, structures/bridges, improvements at Van Buren Street and Cotton Lane, improvements to the frontage roads, rubberized asphalt and pavement markings.

Nighttime and weekend closures of Cotton Lane are scheduled.
DETOUR: Citrus Road.

PROJECT SCHEDULE:

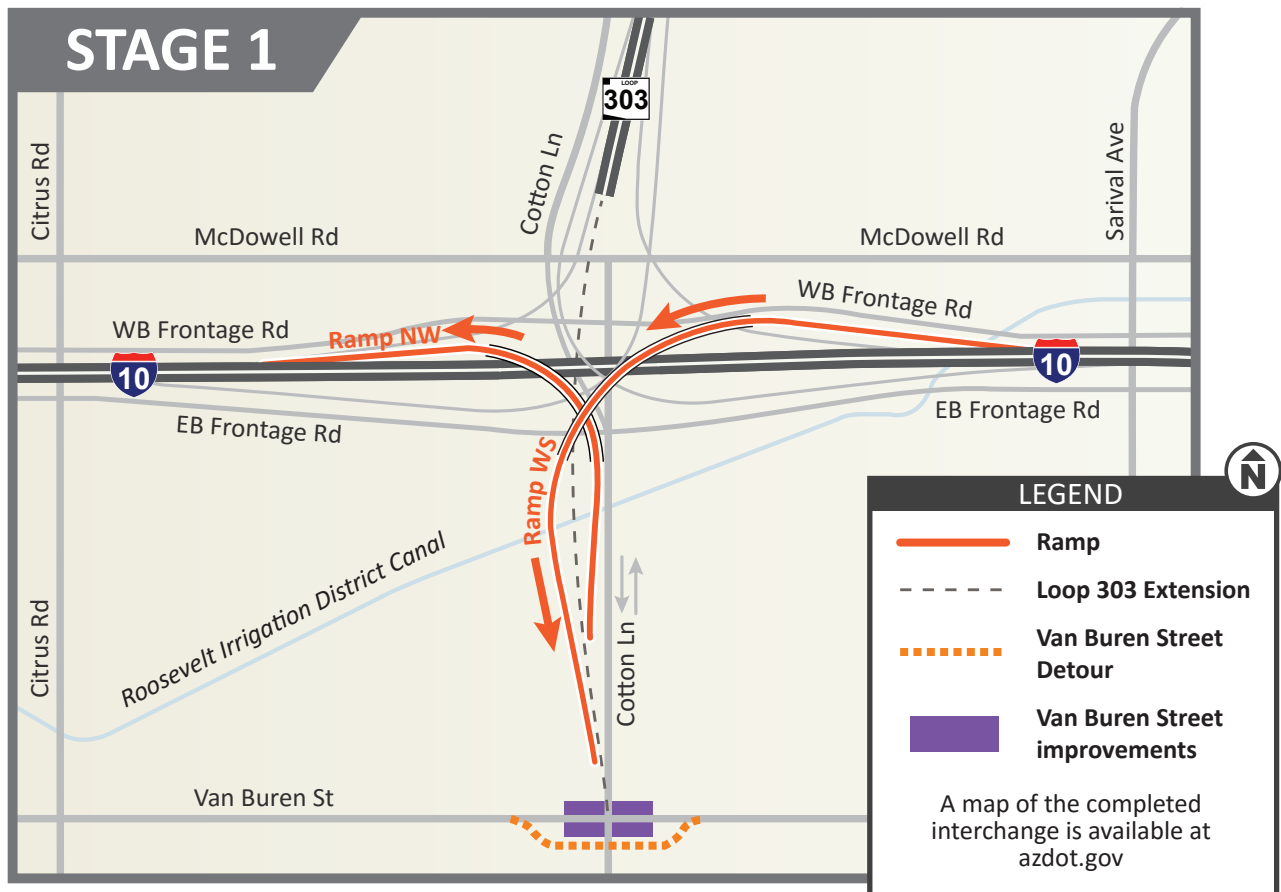

The project is scheduled to begin construction in early 2016. The connectivity improvement project is anticipated to take approximately two years to complete.

The project is being constructed in three stages to minimize construction impacts. Some stages of construction will overlap.

The first stage of construction includes building:

- Northbound Loop 303 ramp that connects to westbound I-10 (Ramp NW)
- Westbound I-10 ramp that connects to southbound Loop 303 (Ramp WS)
- Intersection and drainage improvements at Van Buren Street

These improvements will require temporary road closures, including frontage roads, and a temporary detour of Van Buren Street to keep the project on schedule.

STAY INFORMED:

Future updates will be distributed as the project progresses.
